

To all Journeyman Boilermakers:

We are looking for volunteers to participate in a two day rigging workshop pilot project. The purpose of this project is to gain feedback on the workshop prior to launch. This is not a basic rigging course and participants should have some rigging experience with cranes and engineered lifts.

The course contents include the following modules and is classroom only:

**Day 1 (March 16, 2021)**

- Load weight distribution
- Sling tension
- Rigging selection
- Crane chart interpretation
- Classroom exercises in each module

**Day 2 (March 17, 2021)**

- Drawing interpretation
- Engineered lift studies
- Lift planning and execution
- Classroom exercises in each module

For those interested please contact prior to March 11, 2021:

Russell Reid @ 780-231-6397
