Financial Assistance provided to eligible participants for the duration of the program including Dependant Care, Living & Travel/Transportation Expenses.

About the Program

This eight-week training program is fully funded by Government of Canada to upgrade apprentices and welders across Canada. Participants will learn in-demand pressure welding processes and techniques and will develop competency to meet current, and future industry needs. Those who complete the training will have achieved a series of practical competencies and received multiple pressure welding qualifications that enable them to be job ready.

Contact Information
